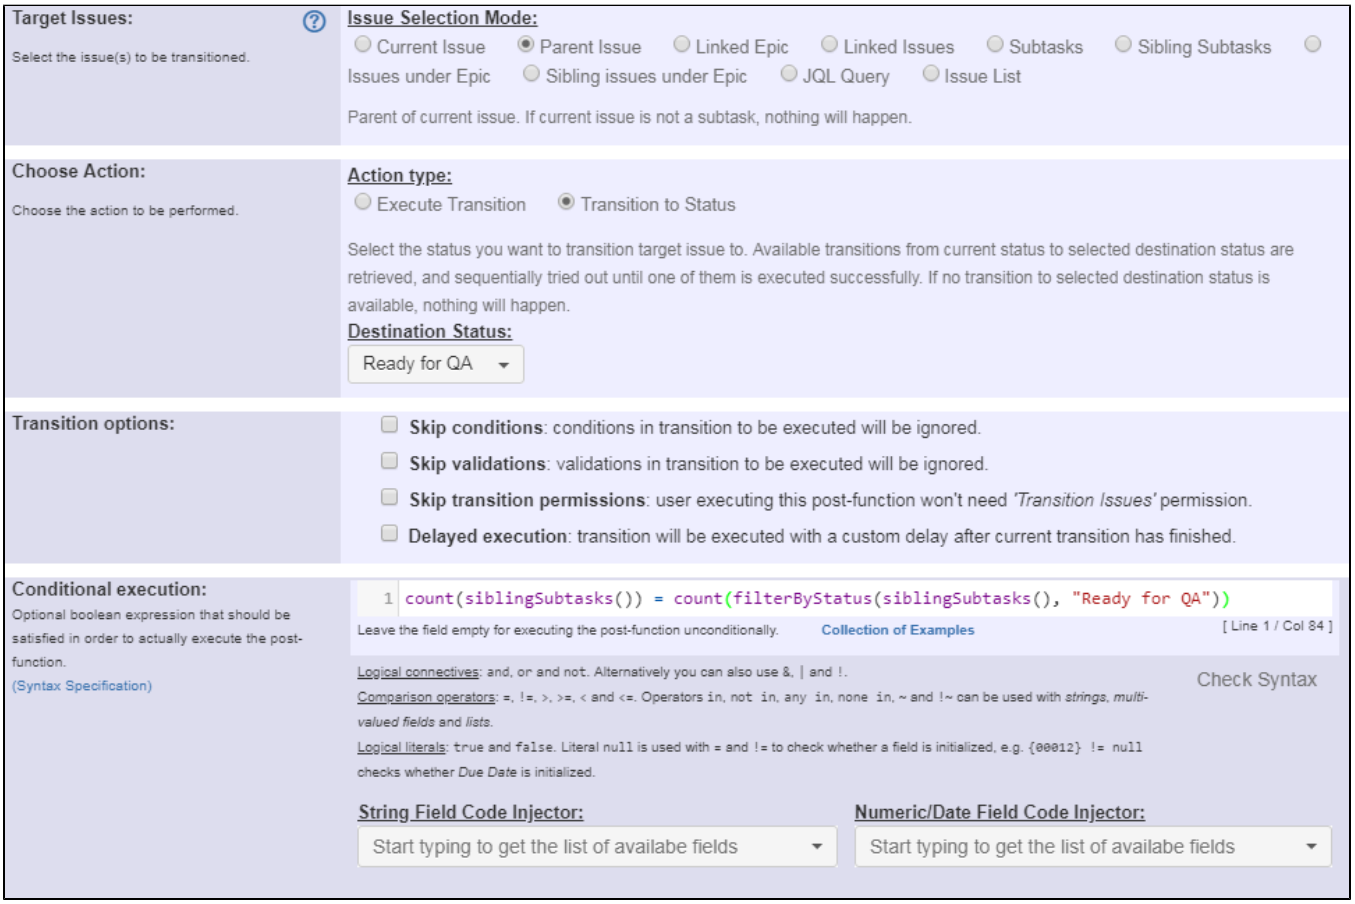
Features used to implement the example

- **Transition issues**

Example: Moving story to "Ready for QA" once all its sub-tasks are in "Ready for QA" status (Transition issues)

When **all** sub-tasks of a story are moved to "**Ready for QA**", the story should move from "**In Progress**" to "**Ready for QA**".
Insert Transition issues post-function into transition from "**In Progress**" to "**Ready for QA**" in sub-task's workflow:



Text to be parsed is: **`count(siblingSubtasks()) = count(filterByStatus(siblingSubtasks(), "Ready for QA"))`**

That boolean expression checks that all the sub-tasks are already at "**Ready for QA**" status. It is also possible to check the sub-tasks against more status, e.g. "**QA Accepted**" and "**Done**". In this case the following expression can be used:

```
count(siblingSubtasks()) = count(filterByStatus(siblingSubtasks(), "Ready for QA, QA Accepted, Done"))
```
