

# JWT release notes 3.4.0

Release date	05 Dec 2023		
Release type	FEATURES	IMPROVEMENTS	MAINTENANCE
Highlights	Feature and improvement release - seamless integration meets robust security		

The **JWT 3.4.0** release has been unpublished due to issues with escaped HTML characters and mutated vowels. For those who have upgraded to JWT 3.4.0, we advise reverting to **JWT version 3.3.1** while we work on an improved version internally.

To downgrade, first uninstall the Jira Workflow Toolbox and the xapps library from the 'Manage Apps' section. Then, reinstall JWT directly from the Atlassian Marketplace. Please note, apart from the previously mentioned critical change, downgrading will not impact any of your existing data.
