

Priority assessment based on field values

Use case

Return a **number that defines the priority of an issue** based on the values of certain fields. If one of the field contains one of the defined values, the total number will increase by one.

Expression

[Create and configure a Smart field](#) using this expression in **General** parsing mode:

```
%{sum([%{issue.cfnnnnn} = "Option 1" ? 1 : 0, %{issue.cfppppp} = "Option 2" ? 1 : 0 ])}
```

Please, replace *nnnnn* and *ppppp* with the IDs of the custom fields, e.g. Select List (single choice).

Used parser functions

- [sum\(\)](#)
