

Number of times issue was changed to the current status

Use case

Return the **number of times that the issue has been changed to the current status**.

Expression

[Create and configure a Smart field](#) using this expression in **Jira expression** mode:

```
issue.changelogs.filter(changelog => changelog.items.some(item => item.fieldId == 'status' && item.toString == issue?.status?.name)).length
```

If it is only necessary to **display the number of times that the issue has been in a specific status**, replace `issue?.status?.name` with the name of the status between brackets, e.g. `'Rejected'`.
