

# Total remaining estimate of blocking issues

## Use case

Return the **remaining estimate** of the **linked issues** linked to the current issue with the issue link type **"is blocked by"** in hours.

## Expression

Create and configure a **Smart field** using this expression in **General** parsing mode:

```
%{sum(append(fieldValue({issue.remainingEstimate}),linkedIssues("is blocked by")),[0]))/60}
```

If the resulting number from the expression contains too many decimal numbers, feel free to select one of the available [display formats](#) or to configure it manually.

## Used parser functions

- [sum\(\)](#)
- [append\(\)](#)
- [fieldValue\(\)](#)
- [linkedIssues\(\)](#)
