

Total original estimate of blocking issues

Use case

Return the **sum of the original estimates** of the linked issues of the current issue linked with the **"is blocked by"** issue link type in hours.

Expression

Create and configure a [Smart field](#) using this expression in **General** parsing mode:

```
%{sum(append(fieldValue({issue.originalEstimate}),linkedIssues("is blocked by")), [0]))/60}
```

If the resulting number from the expression contains too many decimal numbers, feel free to select one of the available [display formats](#) or to configure it manually.

Used parser functions

- [sum\(\)](#)
- [append\(\)](#)
- [fieldValue\(\)](#)
- [linkedIssues\(\)](#)
