## Available functions

Function	Input	Returned value
<b>numberOfSelectedItems</b> (%{...somefield}) : number	FIELD	Returns the <b>NUMBER</b> of selected items in select or multiselect field with field code %{...somefield}.
<b>numberOfAvailableItems</b> (%{...somefield}) : number	FIELD	Returns the <b>NUMBER</b> of available options in select or multiselect field with field code %{...somefield}. It's equivalent to <b>count</b> ( <b>availableItems</b> (%{...somefield})) . Disabled options are discarded.
<b>availableItems</b> (%{...somefield}) : string list	FIELD	Returns a <b>STRING []</b> with available options in select or multiselect field with field code %{...somefield}. Disabled options are discarded. Example: <b>availableItems</b> (%{00103}) returns a string list with all <b>security levels</b> available for the project and current user.
<b>availableItems</b> (%{...somefield}, string <b>option</b> ) : string list 0	FIELD	Returns a <b>STRING []</b> with all available child options in cascading or multilevel cascading field with ID %{...somefield}, and for option parent <b>option</b> . In the case of multilevel cascading fields, a comma separated list of options should be entered. Disabled options are discarded.
<b>allAvailableItems</b> (%{...somefield}) : string list	FIELD	Returns a <b>STRING []</b> with all available options in select or multiselect field with field code %{...somefield}. Disabled options are included. Example: <b>availableItems</b> (%{00103}) returns a string list with all <b>security levels</b> available for the project and current user.
<b>allAvailableItems</b> (%{...somefield}, string <b>option</b> ) : string list	FIELD	Returns a <b>STRING []</b> with all available child options in cascading or multilevel cascading field with ID %{...somefield}, and for option parent <b>option</b> . In the case of multilevel cascading fields, a comma separated list of options should be entered. Disabled options are included.
