

JWT Release Notes 2.2.25

[2016-11-15] Released [Jira Workflow Toolbox 2.2.25](#)

New Features

Added 2 function to the parser, mainly intended to be used with new post-function " [Create issues and sub-tasks](#)".

FUNCTION	RETURNED VALUE
getMatchingValue (string key, number list key_list, number list value_list) : number	Returns numeric value in value_list that is in the same position as numeric key is in key_list , or in case key doesn't exist in key_list and value_list has more elements than key_list , the element of value_list in position <code>count(key_list) + 1</code> . Example: <code>getMatchingValue(5, [1, 3, 5, 7, 9], [1, 1+1, 3*1, 4, 4+1])</code> returns 3.
getMatchingValue (string key, number list key_list, string list value_list) : string	Returns string value in value_list that is in the same position as numeric key is in key_list , or in case key doesn't exist in key_list and value_list has more elements than key_list , the element of value_list in position <code>count(key_list) + 1</code> . Example: <code>getMatchingValue(8, [2, 4, 6, 8, 10], ["Washington", "London", "Paris", "Madrid", "Berlin"])</code> returns "Madrid".

Improvements

- [Issue #441](#) - Support for **Enhanced Issue Picker** custom field provided by [TestFLO - Test Management for Jira](#) add-on.

Bug Fixes

- [Issue #442](#) - "Selected project" project selection method doesn't work in [Create issues and sub-tasks](#) post-function.
- Configuration summary screen of post-functions [Update issue fields](#), [Write field on issues returned by JQL query or issue list](#), [Read fields from linked issues or sub-tasks](#) and [Write field on linked issues or sub-tasks](#) showed escaped HTML.
