Features used to implement the example

- [Calculated Number Field](#)

Example: Number of open subtasks

Count the number of subtasks, which are open (in status category **To Do** or **In Progress**).

A valid configuration for this **Calculated Text Field**:

Math expression for Calculated Number field:

[Line 1 / Col 1] [Syntax Specification](#) Check Syntax ?

1 count(filterByPredicate(subtasks(), ^{%00144} = "To Do" OR ^{%00144} = "In Progress"))

Start typing to get the list of availabe fields ▼

Insert String Value

Start typing to get the list of availabe fields ▼

Insert Numeric Value

Math expression: `count(filterByPredicate(subtasks(), ^{%00144} = "To Do" OR ^{%00144} = "In Progress"))`

 Note that:

- `^{%00144}` is the field code for **Status Category**
- The `^` is used for referencing the field values of the issue list `I` - in this case `subtasks()`. Without, the field codes would reference to the current issue.
[Schema for function `filterByPredicate`(issue list `I`, boolean expression `predicate`)]

Once configured and added to an issue screen, the result will look like this:
