

# Condition except assignee/reporter/project role

This function has been **renamed** with the **JWT 3.0** release.

Find the new documentation at:

[Except assignee](#)

[Except reporter](#)

[User is not in project role](#)

<input type="radio"/>	Except assignee <small>by JWT</small>	Only if issue is not assigned to current user.
<input type="radio"/>	Except reporter <small>by JWT</small>	Only if current user is not issue reporter.
<input type="radio"/>	Except users in a field <small>by JWT</small>	Users in selected field are not allowed to see or execute current transition.
<input type="radio"/>	Hide transition from user	Condition to hide a transition from the user. The transition can only be triggered from a workflow function.
<input type="radio"/>	No Open Reviews Condition	Transition to execute only if there are no related open Crucible reviews.
<input type="radio"/>	Only Assignee Condition	Condition to allow only the assignee to execute a transition.
<input type="radio"/>	Only Reporter Condition	Condition to allow only the reporter to execute a transition.
<input type="radio"/>	Only users in a field <small>by JWT</small>	Only the users in selected field are allowed to see and execute current transition.
<input type="radio"/>	Permission Condition	Condition to allow only users with a certain permission to execute a transition.
<input type="radio"/>	Sub-Task Blocking Condition	Condition to block parent issue transition depending on sub-task status.
<input type="radio"/>	Transition is triggered by Bulk Operation <small>by JWT</small>	Used for bypassing conditions when transition is being executed by a multiple issue modification (bulk operation).
<input type="radio"/>	Transition is triggered by JIRA Workflow Toolbox post-function <small>by JWT</small>	Used to hide transitions to users, but leave them available for execution by JIRA Workflow Toolbox post-functions.
<input type="radio"/>	Unreviewed Code Condition	Transition to execute only if there are no unreviewed changesets related to this issue.
<input type="radio"/>	User Is In Group	Condition to allow only users in a given group to execute a transition.
<input type="radio"/>	User Is In Group Custom Field	Condition to allow only users in a custom field-specified group to execute a transition.
<input type="radio"/>	User Is In Project Role	Condition to allow only users in a given project role to execute a transition.
<input type="radio"/>	User is not in project role <small>by JWT</small>	Only if current user is not in a project role.
