Users in field are (not) in a project role

This function has been **renamed** with the **JWT 3.0** release.

Find the new documentation at:

Users are/aren't in project role (condition)

Users are/aren't in project role (validator)

Purpose

This feature is provided in two flavors: **condition** and **validator**. Its purpose is checking whether **user** (or **users**) contained in a **custom field** or a **system field** are (or are not) in a certain **Project Role**.

Supported Custom Fields

The following custom fields types are supported:

- JIRA native **User Picker (single user)** : selected users must meet the condition
- JIRA native **User Picker (multiple users)** : all selected users must meet the condition
- JIRA native **Group Picker (single group)** : all users in the selected group must meet the condition
- JIRA native **Group Picker (multiple groups)** : all users in all selected groups must meet the condition
- **User picker from project role** custom field provided by **Issue Alternative Assignee** app
- **Transition Caller Field** custom field provided by **JIRA Misc Custom Fields** app
- **User Picker - per Group** custom field provided by **User Group Picker** app
- **SIL User Picker** custom field provided by **User Group Picker PRO** app

Supported System Fields

Also system fields containing users are also available for checking:

- **Current User**
- **Assignee**
- **Reporter**
- **Creator**
- **Project Leader**
- **Last commenter**
- **Watchers**
- **Components leaders**

In subtasks, the same kinds of fields for parent issue are also available:

- **Parent's assignee**
- **Parent's reporter**
- **Parent's creator**
- **Parent's project leader**
- **Parent's last commenter**
- **Parent's watchers**
- **Parent's components leaders**

Example: Watchers are supposed to be at least in one of selected project roles "Developers", "Testers" and "Service Desk Team"

Example of configuration for requiring "**Watchers**" being at least in one of the following project roles "**Developers**", "**Testers**" and "**Service Desk Team**":

| Users in field: | Watchers - [Multi-user] ⬍ |
| | When a **Group Picker** or **Multi-Group Picker** field is selected, all users in the group(s) are evaluated. |

Condition required:	○ **all users** in field are **at least in one** of the selected project roles
	○ **all users** in field are **in each** of the selected project roles
	⦿ **all users** in field are **at least out of one** of the selected project roles
	○ **all users** in field are **in none** of the selected project roles
	○ **at least one** user in field is **at least in one** of the selected project roles
	○ **at least one** user in field is **in each** of the selected project roles
	○ **at least one** user in field is **at least out of one** of the selected project roles
	○ **at least one** user in field is **in none** of the selected project roles

Selected project roles:	☐ Administrators
	☑ Developers
	☐ Service Desk Collaborators
	☐ Service Desk Customers
	☑ Service Desk Team
	☑ Tester
	☐ Users

| Field must be initialized: | ☑ |
| | When checked, if selected field is not initialized the validation will fail. |

| Message to show when validation fails: | All watchers need to belong to any of the following project roles: "Developers", "Testers" or "Service Desk Team". |
| | Hide translations for installed languages |

Language	Validation Failure Message Translation
alemán (Alemania)	
español (España)	Todos los observadores deben pertenece a alguno de los siguientes roles de proyecto:: "Developers", "Testers" o "Service Desk Team".
inglés (Estados Unidos)	
inglés (UK)	
japonés (Japón)	

Usage Examples
