

# JWT Release Notes 2.2.32

[2017-02-26] Released [Jira Workflow Toolbox 2.2.32](#)

## New features

- Added parsing function `wikiToHTML()`, that can be used for composing emails in HTML format using fields with **rich text** format, like issue **Description**. Usage example: [Issue #486](#)

Function	Returned value
<code>wikiToHTML(string s) : string</code>	Renders rich text wiki content into HTML. Example: <code>wikiToHTML("Hello *world*!")</code> return " <code>&lt;p&gt;&lt;ins&gt;Hello &lt;b&gt;world&lt;/b&gt;!&lt;/ins&gt;&lt;/p&gt;</code> ".

## Bug fixes

- [Issue #508](#) - Jira tries to index [Calculated Text Field](#)
- Minor UI bugs.
