JWT Release Notes 2.2.11

[2016-05-06] **Released Jira Workflow Toolbox 2.2.11**

Improvements

- Preview feature for when composing email in HTML format in " Send an email" post-function.
- New option "**Notify by email**" added to " Add a comment" post-function.
- Added field code injectors to " Format field value" post-function.
- Minor UI improvements.

Bug Fixes

- **Group**, **Multi-Group Picker** and **Multi-User Picker** custom fileds in **To** and **Cc** parameters in " Send an email" post-function were not working.
- Field codes in parameters **Leading delimiter**, **Value format** and **Trailing delimiter** parameters weren't being replaced with their corresponding field values.
- Fixed certain layout problems in configuration screens.
- **Issue 262** - Integrity problem between statuses and workflow steps due to interaction with a script listener
