

JWT Release Notes 2.2.38

[2017-06-15] Released [Jira Workflow Toolbox 2.2.38](#)

New features

New parser functions:

Function	Returned value
releaseDates (string versions) : number list	Returns a number list with the release dates for versions in string versions for current issues project. Parameter versions is a comma separated list of version names. Example: releaseDates ("%{00074}") returns the list of release dates for fixed versions. Note that %{00074} is field code for Fixed versions .
releaseDates (string versions , string projects) : number list	Returns a number list with the release dates for versions in string versions for projects in parameter projects . Parameter versions is a comma separated list of version names. Parameter projects is a comma separated list of project keys or project names. Example: releaseDates ("%{00077}", "CRM") returns the list of release dates for affected versions for project with key "CRM". Note that %{00077} is field code for Affected versions .

Bug Fixes

- [Issue #636](#) - Error when trying to set **Epic Link** using an **Epic Name** with white spaces.
- [Issue #650](#) - Function **getMatchingValue**(**expression**, **key_list**, **value_list**) fails when **value_list** contain equal or less elements than **key_list** and the value returned by **expression** doesn't match any key in **key_list**.
