

JWT Release Notes 2.2.9

[2016-03-23] Released [Jira Workflow Toolbox 2.2.9](#)

New Features

- Post-function: [Send an email](#): a new feature added to the plugin for sending custom emails.

Improvements

- Added new parameter in most post-functions of the plugin: **conditional execution**, which allows to execute the post-function only when a certain boolean expression is satisfied.
- Field "**Satisfaction**" from JSD now returns a numeric value.
- Minor improvements in UI.

Bug Fixes

- [Issue #245](#) - Function **allCommenters()** was returning each commenter only once, instead of one per comment created or updated.
- [Issue #253](#) - Bug on parser's error management
- [Issue #274](#) - Failure when copying attachments
- Field "**Satisfaction Date**" wasn't treated as a Date field.
- Field "**Request Participants**" was failing when adding a the first participant using '+' prefix.
