JWT Release Notes 2.2.5

[2016-13-01] **Released Jira Workflow Toolbox 2.2.5**

Improvements

- UI improvement: Added search box to dropdown lists. This is particularly useful in field selector dropdown lists.
- UI improvement: User's selectors now have auto-search feature.

Bug Fixes

- Issue #225 - **HOTFIX** - Post-functions " Read fields from linked issues or sub-tasks" and " Read Field From Issues Returned By JQL Query" were not working when using a field as source value. This error was introduced in version JWT Release Notes 2.2.2.
- Issue #221 - Virtual fields "**Total time spent**" and "**Work logged in Translation**" fail with **european decimal separator**.
- Post-function " Break issue link" didn't work when used a specific user in parameter "**Run as**".
