

JWT Release Notes 2.1.24

[2014-12-22] Released **Jira Workflow Toolbox 2.1.24**

Improvements

- Support for including **validator's custom message translations** for all languages installed in Jira. ([Issue #37](#))
- UI improvement: All checkboxes and radio button **tags have become clickable**. ([Issue #64](#))
- Minor improvements in new option "**Evaluate all the setting rules**" added to post-function "[Set a field as a function of other fields](#)": now it can be used also with "*Ephemeral numbers*" and "*Ephemeral strings*" as target field.

Bug fixes

- **Labels custom fields** rendering was failing. ([Issue #94](#))
- Writing into a **cascading select** custom field wasn't working when options used were restricted by issue type.
- Minor bug in IU related to project options in "*Condition on linked issues*" and "*Validation on linked issues*".
