JWT Release Notes 2.2.15

[2016-08-05] Released Jira Workflow Toolbox 2.2.15

Improvements

- Issue #269 Capability for clearing Sprint field using a post-function
- Issue #360 Post-function " Send an email" now shows the sender's full name in email's header
- Added the following warning message to " Send an email" post-function:

Bug Fixes

- Issue #289 Issue links created in transition screen are ignored when transition is executed by REST
- Issue #342 Transition's virtual fields don't work when transition is executed by JSD Portal and REST API
- Issue #382 Transition's virtual fields don't work when transition is executed by 35D Fordarian (CSFAF)
 Issue #383 Field "Transition's comment" doesn't work when transition is executed by REST
 "Write field on linked issues or sub-tasks", "Read fields from linked issues or sub-tasks", "Write Field On Issues Returned By JQL Query" and "R ead Field From Issues Returned By JQL Query" post-functions failed when trying to copy Sprint field.
- Minor bugs related with license checking messages.
