

JWT Release Notes 2.2.24

[2016-11-13] Released [Jira Workflow Toolbox 2.2.24](#)

New Features

- New " [Create issues and sub-tasks](#) " post-function:

Allows you to automatically create **one** or **multiple** new **issues** and **subtasks** when executing a transition in your workflows. You can also **set the fields of the new issues** based on the values of fields in other issues, and **link the new issues** to the other issues in your Jira instance.

Improvements

- Added help link to documentation of each feature of the plugin.

Bug Fixes

- [Issue #439](#) - Condition [A field is/isn't initialized](#) failed when field was edited in transition screen making the condition become unsatisfied
- Fixed XSS security bug in some features of the plugin.
