

# JWT Release Notes 2.2.22

[2016-10-22] Released [Jira Workflow Toolbox 2.2.22](#)

## New Features

- New virtual field "**New comment (sends email notifications)**", which is similar to "**New comment**" with the difference that it triggers an event for sending email notifications.

## Improvements

- **HIGHLIGHT IMPROVEMENT:** Added a "**Check Syntax**" button in all the features of the plugin. It allows to check the syntax before saving the configuration, accelerating the debug process of your workflow configurations. The following elements can be checked:
  - Boolean expressions
  - Text expressions (advanced parsing mode)
  - Math/Time expressions
  - Setting rules of "[Set a field as a function of other fields](#)" post-function.
  - JQL queries
- [Issue #426](#) - Jira Software's **Epic Link** field now can be set by writing the **name of an epic** into this field.
- [Issue #419](#) - New "**Project Email Address**" option for selecting the sender of an email in "[Send an email](#)" post-function.
- "[Send an email](#)" post-function now admits **names of groups** and **names of project roles** in parameter "**Users in field**" of *To* and *Cc* recipients.
