

JWT Release Notes 2.2.14

[2016-07-17] Released [Jira Workflow Toolbox 2.2.14](#)

Improvements

- [Issue #358](#) - Parser functions `unreleasedVersions()`, `releasedVersions()` and `archivedVersions()` now return versions using the following ordering: by **release date** in ascending order, and by **sequence** (i.e., as shown in UI) in ascending order.

Bug Fixes

- [Issue #364](#) - Post-functions [Write field on linked issues or sub-tasks](#) and [Write Field On Issues Returned By JQL Query](#) don't update current issue when it's in the scope of issues to be written.
- [Issue #368](#) - Post-functions [Read fields from linked issues or sub-tasks](#) and [Read Field From Issues Returned By JQL Query](#) may fail after updating the plugin when you are reading attachment fields.
- [Issue #372](#) - Post-function [Send an email](#) fails when setting **From** as **User in field**.
