JWT Release Notes 2.1.25

[2015-01-07] **To be Released Jira Workflow Toolbox 2.1.25**

New features

- New virtual fields "**Transition attachments**" and "**Transition attachments with details**": can be used to validate files attached in transition screens (file name, mime type and file size.)

Improvements

- Added **mime type** information to virtual field "**Attachments with details**"
- Virtual fields "**Attachments**", "**Attachments with details**" and "**Number of attachments**" now also show attachments added in transition screen.

Bug fixes

- Issue #95: Support for Unicode in string literals
- Issue #96: Using %{nnnnn.i} doesn't show values entered in current transition screen.
- Bug in "**Validation based on regular expression**" affecting to field "**Last comment**" and "**Last comment with details**".
- Virtual field "**Number of transition attachments**" not working in post-functions.
- Virtual field "**Last comment visibility restriction**" not showing visibility restrictions of comment entered in current transition screen.
