

JWT Release Notes 2.2.37

[2017-05-27] Released **Jira Workflow Toolbox 2.2.37**

Improvements

- [Issue #628](#) - Support for setting JSD's **Organizations** custom field.
- [Issue #603](#) - New optional parameter for enabling email notifications in post-functions [Write field on linked issues or sub-tasks](#) and [Update issue fields](#). Until the moment notifications were never carried out on issues written by these 2 post-functions.

Bug fixes

- [Issue #628](#) - After updating to version [2.2.36](#), editing a preexisting post-function for adding new fields to be set doesn't work. You should create a new post-function instead of editing an existing one. This bug affected the following post-functions:
 - [Write field on linked issues or sub-tasks](#)
 - [Update issue fields](#)
 - [Read fields from linked issues or sub-tasks](#)
 - [Read field from issues returned by JQL query or issue list](#)
