

# JWT joins DECADIS

[2017-10-04] [Jira Workflow Toolbox](#) joins **DECADIS**

Dear JWT Users,

I'm happy to announce that **DECADIS AG**, one of Europe's quickly growing Atlassian Platinum Solution Partners, has acquired JIRA Workflow Toolbox. This company currently has [10 home-brew apps in the Atlassian Marketplace](#), and is using JWT as almost unique solution for implementing workflow solutions to their customers for more than 7 years. Thanks to this long experience, DECADIS has often collaborated with me in the evolution of JWT proposing new features, improvements and reporting bugs.

I'm not leaving the boat. I stay in the project as chief architect, lead developer and mentor of the JWT Team at DECADIS. Now, JWT, not being a one-man-project anymore, will fully guarantee reliability and support for all their users (currently 3,000), thanks to a highly trained team of developers and JIRA consultants, maintaining the same high quality level of support JWT is historically renowned for. Even more, now we will be able to engage exciting and ambitious new plans for improving JWT, and for adapting it to a fast evolving Atlassian ecosystem.

Here you have a link to [DECADIS welcome to JWT](#).

Thanks you for trusting JWT,

Fidel Castro Armario
