

xCharts Release Notes 1.4.0

Release date	23 Feb 2018
Release type	IMPROVEMENTS
Highlights	

New features

- Online help links have been updated to the [new xCharts Documentation Site](#).
- **XCHART-14** - Ability to Copy an existing Chart.
- Display vertical datelines (grid lines) on chronological charts, configurable via parameters.

Improvements

- **XCHART-16** - Service Desk fields are not displayed nicely when grouping by them.
- **XCHART-17** - Bars should not overlay when displaying larger periods of time.
- Improved method descriptions in the [xCharts-API Javadoc](#).
- Preview images for built-in charts on the Chart Templates overview page.
- Show the "Edit" button directly in the chart browser.
- Display useful information in the "Time in Status" chart when grouping by "None".
- Numbers in Charts are formatted according to the user's locale.
- Added two templates to choose from when creating a Chart Data or Chart Layout Script.
- Remove the "Please vote for this feature" message from the Charts page in the project overview.

Bug fixes

- **XCHART-15** - Time period value not preserved while editing Time Frame Chart.
- **XCHART-18** - Grouping does not work properly when multiple contexts exist for a custom field.
- The dashboard background color is not being taken into account.
- The time Period parameter is always using the default value instead of user selection.
