Bulk delete inactive configurations

Bulk Delete is a feature which supports **deletion of multiple Jira configurations at once**, e.g. Issue type schemes or inactive workflows.

As of now, the bulk delete operation just works **for unused** (e.g. unused field configurations) **or inactive** (e.g. inactive workflows) **items in Jira.**

Name ▾	Issue type screen schemes ▾		76	⤴	⚙	🗑

What can be deleted

The Bulk Delete operation is available for the following administrative items in Jira:

- Inactive workflows
- Inactive workflow schemes
- Issue security schemes
- Issue type schemes
- Issue type screen schemes
- Field configurations
- Field configurations schemes
- Notification schemes
- Permission schemes
- Priority schemes
- Screens
- Screen schemes
- Statuses

Bulk delete in detail

The following picture shows the usage of Admin Toolbox's bulk delete.

All of the above listed, supported screens display the shown toolbar with the bulk delete button.

Clicking this button will cause the deletion of all unused and inactive items.

View Screen Schemes

ID	Name	Issue type screen schemes	Actions

11704	**BROW: Scrum Default Screen Scheme**	• BROW: Scrum Issue Type Screen Scheme	Configure Edit Copy
11800	**CRM: Default Screen Scheme**	• CRM: Task Management Issue Type Screen Scheme	Configure Edit Copy
11900	**CRM: Task Screen**	• CRM: Task Management Issue Type Screen Scheme	Configure Edit Copy

Bulk delete unused/inactive configurations

If there are items to delete, they will be listed and can be selected for deletion. By clicking on the checkbox on the top, all items in the list will be marked.

Only items that are not in use can be deleted. They must not be part of any schemes or projects.

Bulk delete Workflows
