# Getting Started

Features

- Activity stream - easily accessible anywhere in Jira via the activity button - without reloading the page
- Notification of new activities within a Jira session
- Filter option similar to those on the dashboard gadget
- Option to suppress notification about own activities

Installation

Install Activity using the UPM in Jira. After the successful installation, the app will be active showing a new icon in the header. Clicking on the icon will display activities or the possibility of configuring the personal settings.

Supported events

⚠ **Due to a bug in the standard Jira Activity Stream, which we use to display events in Activity for Jira, the following table shows the supported/unsupported events.**

Supported	Unsupported
✅ Attachment added	❌ Issue closed
✅ Comment added	❌ Issue opened
✅ Issue created	❌ Issue progress stopped
✅ Issue edited	❌ Issue reopened
✅ Issue progress started	❌ Issue resolved
✅ Issue transitioned
