Features used to implement the example

- [Calculated Number Field](#)

Example: Total of all story points in an epic

Sum up all the story points of stories under an epic as **Total Story Points**.

A valid configuration for this **Calculated Number Field**:

Math expression for Calculated Number field: [Line 1 / Col 1] [Syntax Specification](#) [Check Syntax](#) 

1 `sum(fieldValue({10106}, issuesUnderEpic(%{00015})))`

Start typing to get the list of available fields ▼

Insert String Value

Start typing to get the list of available fields ▼

Insert Numeric Value

Math expression: `sum(fieldValue({10106}, issuesUnderEpic(%{00015})))`

 Note that:

- `{10106}` is the field code for **Story points** (this field code might differ on your Jira instance)
- `%{00015}` is the field code for **Issue key**

Once configured and added to an issue screen, the result will look like this:

Story Points / SPOINTS-3

First Epic
