- Example: Change parent's status depending on sub-task's summary (Transition issues)
- Other examples of that function
- Related Usage Examples

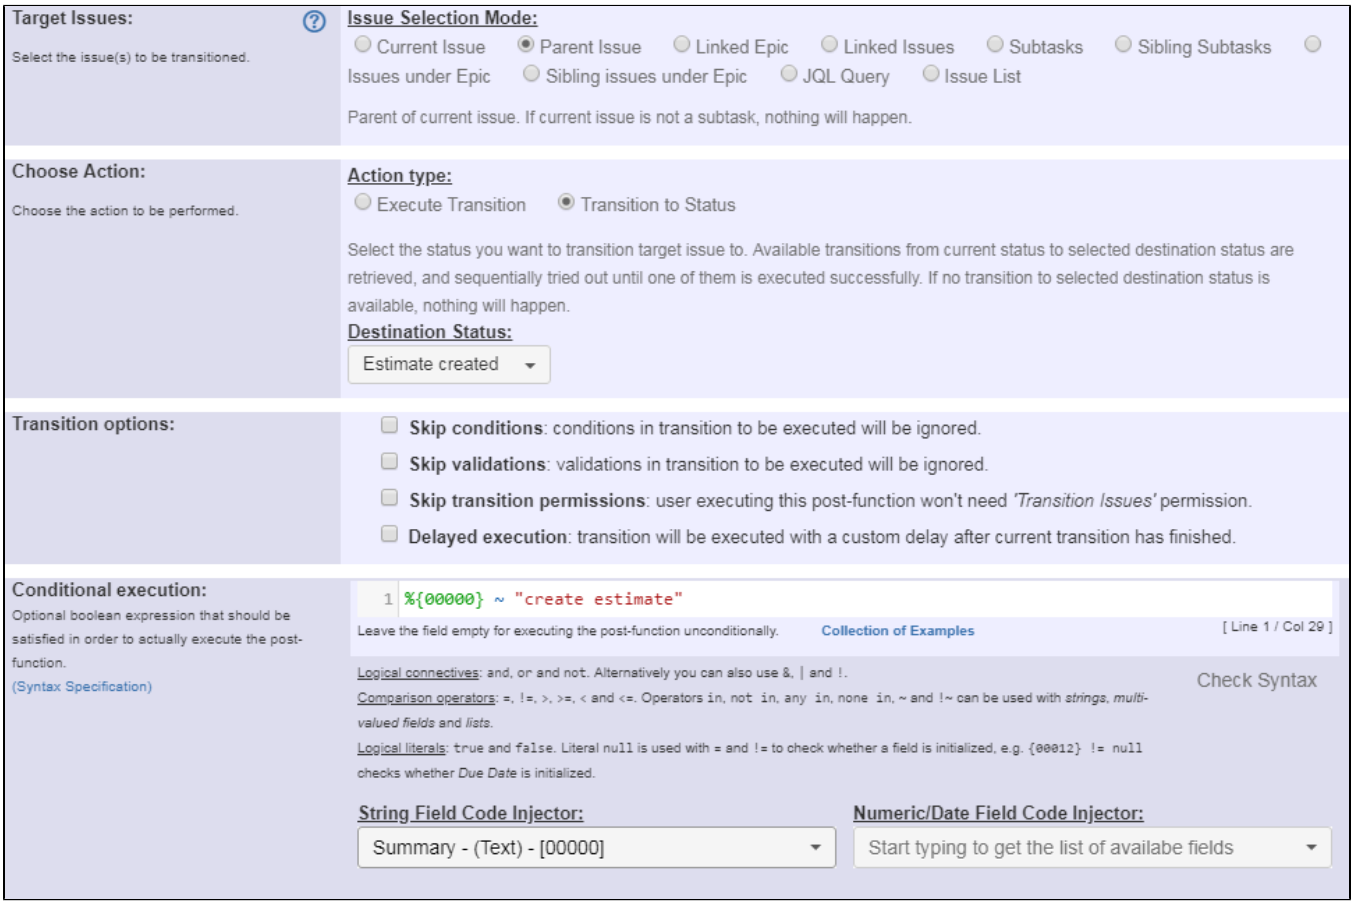
Features used to implement the example

- **Transition issues**

Example: Change parent's status depending on sub-task's summary (Transition issues)

In this example the parent issue should be transitioned to status "**Estimate created"** when the sub-task's summary contains the key words "**create estimate**".

This can be done using the Transition issues post function in the **Create** transition ofthe subtask's workflow:

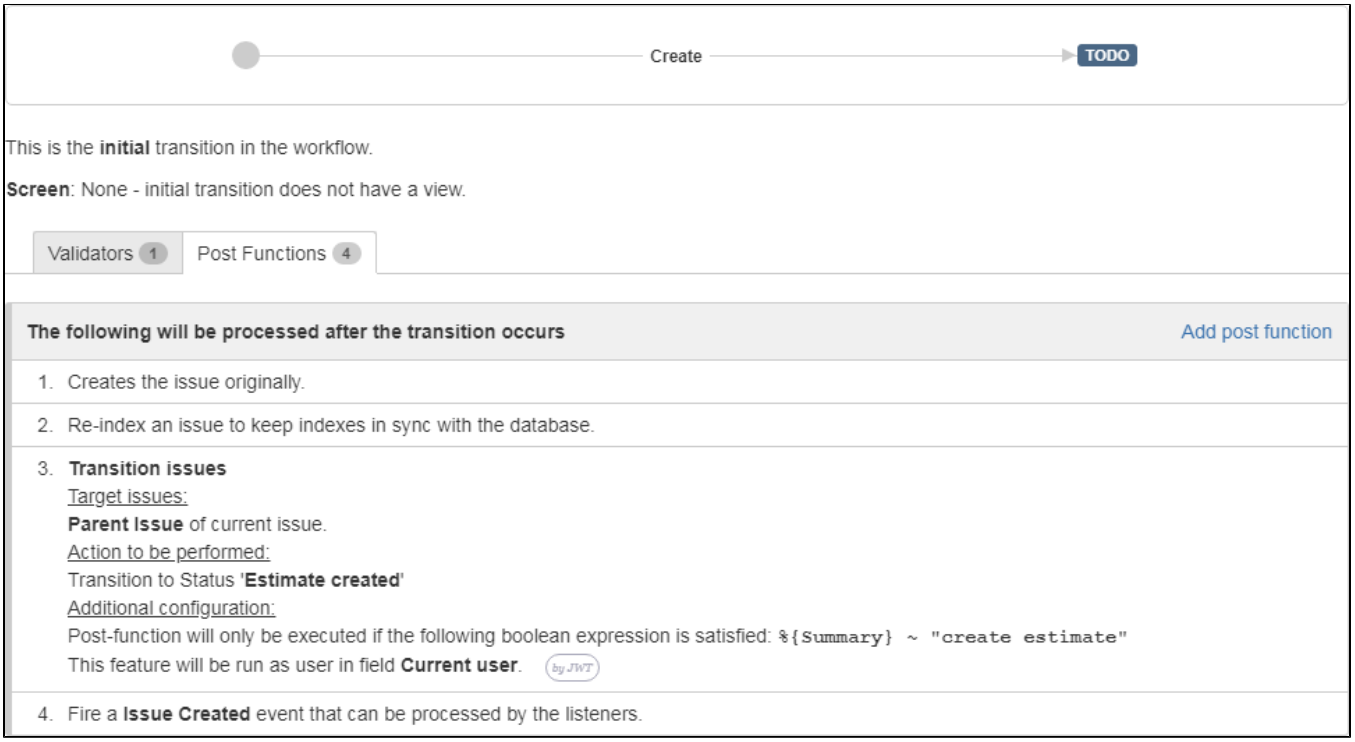


Text to be parsed: **`%{00000} ~ "create estimate"`**

Note that:

- **%{00000}** is field code for field "**Summary**"

Once configured, the transition will look like this:



Other examples of that function
