Purpose

This feature is provided in two flavors: **condition** and **validator**. Its purpose is checking whether **user** (or **users**) contained in a **custom field** or a **system field** are (or are not) in a certain **Project Role**.

Supported Custom Fields

The following custom fields types are supported:

- JIRA native **User Picker (single user)** : selected users must meet the condition
- JIRA native **User Picker (multiple users)** : all selected users must meet the condition
- JIRA native **Group Picker (single group)** : all users in the selected group must meet the condition
- JIRA native **Group Picker (multiple groups)** : all users in all selected groups must meet the condition
- **User picker from project role** custom field provided by [Issue Alternative Assignee](#) app
- **Transition Caller Field** custom field provided by [JIRA Misc Custom Fields](#) app
- **User Picker - per Group** custom field provided by [User Group Picker](#) app
- **SIL User Picker** custom field provided by [User Group Picker PRO](#) app

Supported System Fields

Also system fields containing users are also available for checking:

- **Current User**
- **Assignee**
- **Reporter**
- **Creator**
- **Project Leader**
- **Last commenter**
- **Watchers**
- **Components leaders**

In subtasks, the same kinds of fields for parent issue are also available:

- **Parent's assignee**
- **Parent's reporter**
- **Parent's creator**
- **Parent's project leader**
- **Parent's last commenter**
- **Parent's watchers**
- **Parent's components leaders**

Example: Watchers are supposed to be at least in one of selected project roles "Developers", "Testers" and "Service Desk Team"

Example of configuration for requiring "Watchers" being at least in one of the following project roles "Developers", "Testers" and "Service Desk Team":

Users in field:	Watchers - [Multi-user]  When a Group Picker or Multi-Group Picker field is selected, all users in the group(s) are evaluated.
Condition required:	☐ all users in field are at least in one of the selected project roles ☐ all users in field are in each of the selected project roles ☒ all users in field are at least out of one of the selected project roles ☐ all users in field are in none of the selected project roles ☐ at least one user in field is at least in one of the selected project roles ☐ at least one user in field is in each of the selected project roles ☐ at least one user in field is at least out of one of the selected project roles ☐ at least one user in field is in none of the selected project roles
Selected project roles:	☐ Administrators ☒ Developers ☐ Service Desk Collaborators ☐ Service Desk Customers ☒ Service Desk Team ☒ Tester ☐ Users
Field must be initialized:	☒ When checked, if selected field is not initialized the validation will fail.

Message to show when validation fails:	All watchers need to belong to any of the following project roles: "Developers", "Testers" or "Service Desk Team". Hide translations for installed languages
Language	Validation Failure Message Translation
alemán (Alemania)	
español (España)	Todos los observadores deben pertenece a alguno de los siguientes roles de proyecto:: "Developers", "Testers" o "Service Desk Team".
inglés (Estados Unidos)	
inglés (UK)	
japonés (Japón)
