

xCharts Release Notes 1.5.0

Release date	02 Sep 2020
Release type	MAINTENANCE FEATURES
Highlights	Improvements and new features like chart export

New features

- Support for "Group by project category"
- Possibility to load groovy and layout scripts from the JIRA_HOME directory
- Ability to export charts as images
- Ability to define a target value in several charts
- Possibility to display Chart data in JSON format underneath the chart

Improvements

- Time in the status chart: If the highest value is under 1 day, the y-axis unit changes from days to hours
- When scripting your own charts, navigation between the single sections is now possible with tabs
- Alphabetical order of charts when selecting them in the xCharts Gadget

Bug fixes

- Fixed encoding problem causing Unicode texts to be wrongly displayed
- Changing a picker parameter to a text parameter threw an error
- Parameters did not always show up when editing scripted charts
- Customer request type display name wasn't resolved properly
