# xCharts Release Notes 1.7.2

| Release date | 01 Oct 2019 |
|---|---|
| Release type | MAINTENANCE |
| Highlights | Along with the **End of Life** for **Jira 7.5**, the last supported version is now **Jira 7.6** |

## Compatibility

- Along with the **End of Life** for **Jira 7.5**, the last supported version is now **Jira 7.6**

## Improvements

- A message is displayed when exporting results to xCharts Gadget in **Jira 8+** from **Issue Navigator's Dashboard charts export**
- New button to **Create new chart** from Charts page
- Updated English and German **internationalization**
- **Upgraded C3.js** to v0.7.8 and **D3.js** to v0.5.11

## Bug fixes

- **Scripted charts** did not **render in gadgets** in version 1.7.1
- **The cancel button was misplaced** after re-adding the script file
- **Quick Search** navigated to the wrong URL on the Chart Layout Script page
- The width of bars in **the bar chart** was very small with certain settings
- **Single Select** picker did show **None** after being saved
- **Charts froze** when the data was big for C3 to **render**
- **Gauge chart** main values were overlapped
- **Date Field** picker did not show saved field items
- Number labels in **Time in Status chart** had multiple decimal points
- A user without **permission** was able to see the **edit chart button**
- **Preview of parameters** in Scripted Chart did not reflect the current language after switching
- **Script Chart** page had two Javascript errors
- **Accumulated Fields** picker did not show saved field items
- **Gauge chart** always showed a maximum value of 100
- **Versions Release Dates chart** displayed incorrectly in charts Gadget+ in Jira 7
- In Jira 8+, **charts' permissions** were not set for **users**
- **xChart Gadget+** did not render the non-live-parameter charts in their own gadgets
- **Gauge chart in Versions Release Dates** chart showed incorrect tooltip
