

JWT Release Notes 2.8.0

[Direct download from Marketplace](#)

New features

- Added support for Botron's **Configuration Manager for Jira** (see our [documentation](#))
- Added support for **Jira 8.6.x**

Bug fixes

- The **Fields required or changed validator** did not work properly when using **version fields** after upgrading to JWT version 2.7.1
- **Jira Service Desk approval emails** did not work properly when using JWT-related post functions on the transition to the approval step
