

# Conditions

Conditions are used to control the transitions **available** to a user.

If a condition fails, the user will **not see the transition button** on the Jira issue view, will not be able to execute the transition, all **Validators**, and potential **Post functions** will be ignored.

## Available conditions

Jump right in and configure any of the available conditions listed below. Each condition comes with built-in examples.

If you are just looking for some **inspiration**, head over to our large use case library and check out our [Workflow use cases!](#)

Condition	Short description	Label
<a href="#">Compare two values condition</a>	<b>Evaluate</b> the comparison of <b>two</b> (field) <b>values</b> .	STAFF PICK
<a href="#">Condition based on cascading select list value</a>	Evaluate the <b>comparison</b> of a given <b>value</b> against an <b>option</b> of a <b>cascading select list</b> field.	
<a href="#">Condition based on JQL query</a>	Evaluate issues against the <b>output</b> of a <b>JQL query</b> .	STAFF PICK
<a href="#">Condition based on regular expression</a>	Evaluate (field) <b>values</b> against a <b>regular expression</b> .	
<a href="#">Condition on JWT project property</a>	Evaluate the value of <b>JWT project properties</b> .	
<a href="#">Condition on linked issues</a>	Evaluate the current <b>state</b> (type, status, number, etc.) of <b>issue links</b> .	STAFF PICK
<a href="#">Condition on sub-tasks</a>	Evaluate the <b>current state</b> (type, status, number, etc.) of <b>sub-tasks</b> .	STAFF PICK
<a href="#">Except assignee</a>	<b>Prevent</b> the current <b>assignee</b> from executing the transition.	
<a href="#">Except reporter</a>	<b>Prevent</b> the issue <b>reporter</b> from executing the transition.	
<a href="#">Except users in a field</a>	<b>Prevent users</b> (or groups) stored in a <b>field</b> from executing the transition.	
<a href="#">Fields required</a>	Check if fields are <b>set/empty</b> .	STAFF PICK
<a href="#">Hide transition from user (bulk operation only)</a>	Ensure that the transition is <b>only available</b> when performing a <b>bulk transition operation</b> .	
<a href="#">Hide transition from user (JWT function only)</a>	Ensure that the transition is <b>only available</b> when being triggered by another <b>JWT function</b> .	
<a href="#">Logical condition</a>	Evaluate a <b>logical expression</b> that returns <b>true</b> or <b>false</b> .	STAFF PICK
<a href="#">Only users in a field</a>	<b>Enable</b> only <b>users</b> or <b>groups</b> stored in a <b>field</b> to execute the transition.	
<a href="#">User is not in project role</a>	Ensure that the <b>current user</b> is <b>not a member</b> of a given <b>project role</b> .	
<a href="#">Users are/aren't in project role (condition)</a>	Evaluate whether users are <b>members</b> of given <b>project roles</b> .
