

Assign important issues to the project lead

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

In the following use case the issue gets automatically **assigned** to the **project lead**, if the priority was set to **Highest**.

Configuration

1

Add the [Update or copy field values](#) post function to the desired transition or create a new transition.

You might want to add the post function to the **create transition** of the workflow so that the post function gets executed every time a new issue is created.

2

Target issue

Choose **Current issue**

3

Fields

Choose **Assignee**

4

Value

In the **popup**, choose the value **Set field value manually (parser expression)**

5

Expression

Set it to **Basic text** and use the following expression

```
%{issue.project.lead}
```

6

Conditional execution

```
%{issue.priority} = "Highest"
```

By using this conditional execution, the assignee will only be updated, if the priority was set to **Highest**.

User

Choose **Current user**

Update parameters of the Update or copy field values Function for this transition.

Update parameters of the Update or copy field values Function for this transition.

Basic configuration *

Define the required parameters needed to execute this post function.

Target issue *

Current issue

Select the issues to be updated.

Fields *

Define the fields to be updated.

Field	Value	Write protection
Assignee	Parser expression %{issue.project.lead}	
Add field		

> Additional options

Conditional execution

The post function will only be executed if the following condition (a logical expression) is met.

Expression

1 %{issue.priority} = "Highest"

The expression must return true or false.

> Run as

Update or copy field values

Documentation

Update one or multiple issue fields or copy field values across the same issue or related issues (parent / child, Epic / Story, linked issues and more).

Workflow

JWT 3.0.0 Use cases

Examples

Pick one of the following example configurations and get started in no time. More details will be provided upon your selection.

- Assign issue to current user
- Keep parent's priority in sync
- Assign important issues to the project lead
