

dayOfTheWeekToString()

This function returns the **day of the week** of **any given timestamp** in **text** form.

Syntax

dayOfTheWeekToString(timestamp, timeZone, language) #Output: Text

Examples

Parser expression	Description
<pre>dayOfTheWeekToString({issue.dueDate}, LOCAL, USER_LANG)</pre>	This example returns the day of the week as text. If the due date was set to March 25th, 2020 23:15 and the user's Jira language was set to English, the output would be Friday.

Additional information

Parameters used in this function
