Transition issue action

Execute a **specific transition** or transition to a **specific status**. The action will be performed on the issue currently being processed.

Transition issue configuration

Below you will find a detailed description of each parameter needed to configure the action.

Mode

Select the way the issue should be transitioned. It can be chosen from one of the following options:

- **Transition to status -** the first available transition to the target status will be executed.
- **Execute transition** - select any transition from active workflows.

Additional options

Ignore conditions

When selected the **conditions** for this transition will be ignored and skipped.

Check all (ignore) options if you want to make sure that the transition will be executed.

Ignore validators

When selected the **validators** for this transition will be ignored and skipped.

Check all (ignore) options if you want to make sure that the transition will be executed.

Ignore permissions

When selected the **Transition Issues** project permission will be ignored.

Check all (ignore) options if you want to make sure that the transition will be executed.

Run as

Select the user that will be used to execute this action.
