

# numberOfAvailableItems()

This function returns the **number of available options** of **selectable fields**.

Disabled options will be ignored.

## Syntax

```
numberOfAvailableItems(field) #Output: Number
```

## Examples

Parser expression	Description
<pre>numberOfAvailableItems(%{issue.securityLevel})</pre>	This example returns the number of all available <b>security levels</b> available for the project and current user, e.g. <b>3</b>

## Additional information

This function is equivalent to `count(availableItems(%{...somefield}))`.

Disabled options are discarded.

Parameters used in this function

Parameter	Input (data type)	Description
field	TEXT	The parameter must be a valid <a href="#">field code</a> for a <a href="#">selectable field</a> .

## Output

This function returns a **NUMBER**

If you need the **actual options** instead of just the number try using [availableItems\(\)](#)
