## dayOfTheWeekToString()

This function returns the day of the week of any given timestamp in text form.

## Syntax

```
dayOfTheWeekToString(timestamp, timeZone, language) #Output: Text
```

## Examples

| Parser expression | Description |
| :--- | :--- |
| dayOfTheWeekToString ( $\{$ issue. <br> dueDate\}, LOCAL, USER_LANG) | This example returns the day of the week as text. |
|  | If the due date was set to March 25th, 2020 23:15 and the user's Jira language was <br> set to English, the output would be Friday. |
