

Update field action

Update almost **any field** to **any valid value**.

Update field configuration

Below you will find a detailed description of each parameter needed to configure the action.

Field

Select the field that should be updated. Based on the selected field it can be chosen from the following option:

- **Selected value** - set a dedicated value. Only available for [selectable fields](#).
- **No value - clear field** - clears the value from the specified field.
- **Value returned by parsed expression** - be creative and use the [expression parser](#) to set the field value.

Additional options

Enable email notifications

Choose whether an email notification should be sent according to the applicable notification scheme or not.

Run as

Select the user that will be used to execute this action.
