Issue selector

The **Issue selector** needs an issue (context) as a starting point.

Therefore it can only be used with the following **issue-related** event trigger types:

- Field Changed Event
- Issue Event
- Issue Transitioned Event

Issue selector configuration

Below you will find a detailed description of each parameter needed to configure the condition.

Target issue(s)

Select the issues that should be **collected** by the **selector**. Based on the selection, additional **filters** can be set for **limiting** the result.

List of available target issues

- **Parent issue** - The parent of the issue triggering the event.
- **Sub-tasks** - All sub-tasks of the issue triggering the event.
- **Sibling sub-tasks**

more info...

Sub-tasks under the **same parent** as the issue triggering the event, **excluding** the issue which is **triggering** the **event**.

- **Linked issues** - All issues linked to the issue triggering the event.
- **Linked epic** - The epic linked to the issue triggering the event.
- **Issues under epic/ stories**

more info...

All issues linked to the **epic** triggering the event. Only works if the issue triggering the event is of issue type "Epic".

- **Sibling issues under epic/ sibling stories**

more info...

Issues linked to the same **epic** as the issue triggering the event. Excluding the issue, which is triggering the event.

- **Issue list expression** - All issues returned by a list expression.

Run as

Select the user that will be used to execute this action.

Only issues that this user is able to **view** (e.g via permissions, security levels) will be selected.

📁 Use Cases and example

Title	Automated action	JWT feature	Label
Copy the parent issue comments to its sub-tasks	Add comment action	⚡	
Sum up value in parent issue on field change in sub-tasks	Update field action	⚡	
Close epic when stories are done	Transition issue action	⚡	
Automatically close parent when all sub-tasks are done	Transition issue action	⚡	STAFF PICK
Reindex linked issues	Reindex issue action	⚡	
Keep the status of parents and sub-tasks in sync	Transition issue action	⚡	STAFF PICK
Keep the priority of parents and sub-tasks in sync	Update field action	⚡	
Automatically close sub-tasks when parent is completed	Transition issue action	⚡	STAFF PICK
Close stories when epic is done	Transition issue action	⚡
