filterByStatusCategory()

This function filters a given **issue list** by the provided **status categories**.

Syntax
`filterByStatusCategory(issueList, statusCategories) #Output: Issue list`

Examples

Parser expression	Description
`filterByStatusCategory(linkedIssues("is blocked by"), "New, In Progress")`	This example returns the **issue list** of blocking issues in statuses with categories **New** or **In Progress**. To achieve this, the following functions are used: • linkedIssues()

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
`issueList`	ISSUE LIST	Any given issue list. Usually this value is retrieved from a function (e.g. linkedIssues() or subtasks()).
`statusCategories`	TEXT	A text with a status category name. Several status categories can be provided as comma separated list.

Output

This function returns an ISSUE LIST
