

numberOfRemoteIssueLinks()

This function returns the **number** of issue links to remote Jira instances using any of the given issue link types types.

Link types can be entered as a comma-separated list of issue link type names, or as an empty text ("") for representing all issue link types.

Syntax

numberOfRemoteIssueLinks(linkTypes) #Output: Number

Examples

Parser expression	Description
numberOfRemoteIssueLinks("")	This example returns the number of all remote issue links, e.g.: 3
