

# archivedVersions()

This function returns a **text list** with all archived version names of the current issue's project.

The output will be ordered by **release date** in **ascending order**, and by **sequence** (i.e., as shown in UI) in ascending order.

### Syntax

archivedVersions() #Output: Text list

### Examples

Parser expression	Description
archivedVersions()	This example may return [1.0, 2.0]

### Output

This function returns a 

TEXT LIST

Variant where you additionally define **multiple projects**.

Returned versions may either be released or unreleased. **Project keys** or **project names** may be entered as a comma-separated list.

### Syntax

archivedVersions(projects) #Output: Text list

### Examples

Parser expression	Description
archivedVersions("TEST, JWT")	This example may return [0.0.59 beta, 0.0.1]
