

# groupsUserBelongsTo()

This function returns a text list of **group names** users are belonging to. You can specify **user names**, **group names** or **role names**.

Multiple items can be specified as a comma-separated list.

## syntax

```
groupsUserBelongsTo(users) #Output: Text list
```

## Examples

Parser expression	Description
<code>groupsUserBelongsTo( "b.smith" )</code>	This example returns <b>all groups</b> b.smith belongs to, e.g.: <b>jira-developers, jira-administrators</b>
<code>groupsUserBelongsTo( "jira-administrators" )</code>	This example returns <b>all groups</b> of all users that are member of the <b>jira-administrators</b> group, e.g.: <b>jira-users, jira-administrators</b>
<code>groupsUserBelongsTo( "Users" )</code>	This example returns <b>all groups</b> of all users that are member of the <b>Users</b> project role, e.g.: <b>jira-users, jira-developers</b>
