

Issue transitioned event

The **Issue transitioned event** trigger executes a rule whenever an issue is **transitioned** through the workflow.

Issue transitioned event configuration

Once configured, **any workflow transition** will trigger this rule - any issue type, any project, any workflow.

It is **highly recommended** to further limit the execution of the rule using [automation conditions](#) (e.g. to limit execution to only a specific issue type).

Use cases

Use case	Automated action	Use case description	Complexity
Keep the status of parents and sub-tasks in sync	Transition issue	When an issue is being rejected , all sub-tasks will be transitioned to the REJECTED status as well - automatically.	BEGINNER
Assign an issue to the last assignee on a transition	Assign issue	When an issue is transitioned to the DRAFT status, the issue will be automatically re-assigned to the last assignee from the project role "Developers" .	BEGINNER
