Transition affected issues when releasing a version (automatically)

On this page

Project event | Issue version selector | Transition issue action | Screencast | Related use cases

Use case

Developing new software can be perfectly tracked within Jira. But at some point, new software has to be **released and all related tickets should then be closed**.

The following rule can be used to **automatically transition** all issues in the **fixed version** to be transitioned to DONE

Project event

1 **Create a new rule and name it appropriately.**

Providing a description will help you to identify what the rule does but this step is optional.

2 Add a **Trigger** **Project Event** **Version released**

In this case, the **Version released** event will be used. When no project is specified, the trigger will listen on every project for version releases.

Issue version selector

3 Add **Selector** **Issue Version Selector**

4 **Version Fields***

Choose **Fix Version/s**

Transition issue action

5 Next to **Issue Version Selector** click on **Add** **Action** **Transition issue**

6

Mode*

Choose **Transition to Status Done**

> The target status has to be reachable from the current status, otherwise, the action **will not be executed**.

7

Enable the rule by clicking on the **Enable button** 

Screencast

This is how the configuration above should look on your screen

Your browser does not support the HTML5 video element

Related use cases

Title	Automated action	Use case description	Complexity
Bulk edit the issue resolution	**Transition issue**	Set a **specific resolution** on all completed issues that miss a resolution value.	BEGINNER
Transition issues when assigned to a developer	**Transition issue**	When the **assignee** is **changed** to a user in the "Developers" project role, the issue is transitioned to IN DEVELOPMENT.	BEGINNER
Transition affected issues when releasing a version (manually)	**Transition issue**	Manually transition **all issues** related to a specific **version** to DONE.	BEGINNER
Transition affected issues when releasing a version (automatically)	**Transition issue**	Automatically transition all **unresolved issues** with a Fix Version that is being **transitioned** to DONE.	BEGINNER
Schedule the escalation of overdue issues	**Transition Issue**	Periodically **escalate** all issues where the **due date** has been reached.	BEGINNER
Schedule issues for re-submission	**Transition Issue**	Periodically **transition** all issues to OPEN when the re-submission **date** reminder has been reached.	BEGINNER
Resolve issues when all options of a checklist are checked	**Transition issue**	When all options of a custom **checkbox** field are ticked, the issue is resolved and transitioned to DONE	INTERMEDIATE
Keep the status of parents and sub-tasks in sync	**Transition issue**	When an issue is being **rejected**, all **sub-tasks** will be transitioned to the REJECTED status as well - automatically.	BEGINNER
