Use case

When keeping track of issues to be done, it is helpful to **add a reminder to them**. Here we are going to use a **custom date-time field** called "Reminder". Every morning at 01:00 am, the following rule **checks for issues that have reached the re-submission date** and will **re-transition them** to

OPEN

Scheduled trigger

1

Create a new rule and name it appropriately.

Providing a description will help you to identify what the rule does but this step is **optional**.

2

Add a **Trigger** **Scheduled** and choose who you want to execute this rule in **Run as***

1

Schedule*

Choose **Daily**

2

Interval*

Set to **Once per day at 1:00 am**

JQL selector

3

Add **Selector** **JQL Selector**

4

JQL Query*

Use the following **Expression**:

```
nnnnn = startOfDay()
```

nnnnn has to be the **name** of the **custom date field**, like "Reminder" or "duedate".

Transition issue action

5

Next to **JQL Selector** click on **Add Action Transition Issue**

6

Mode*

Choose **Transition to status** **Open**

The target status has to be reachable from the current status, otherwise, the action **will not be executed**.

7

Enable the rule by clicking on the **Enable button** 

Screencast

This is how the configuration above should look on your screen

No screencast available at the moment
