

Create issue link action

Create an **issue link** to a single or multiple issues.

Create issue link configuration

Below you will find a detailed description of each parameter needed to configure the action.

Issue link type*

Select the **issue link type** for the issue link(s) that will be created.

Issue selection*

Select the **issue(s)** at the destination of the issue link from one the following options:

- **Parent issue from event** - available if the issue being processed is a sub-task.
- **JQL Query** - link to issue(s) returned by a JQL query.
- **Issue list expression** - link issues being returned by an [issue list expression](#).
- **Issue key**- specify an issue key to be linked.

Use cases

Use case	Automated action	Use case description	Complexity
Track issues mentioned in comments	Create issue link	Automatically link issues based on comments .	ADVANCED
