

Import and export rules

You can easily import and export rules in a **JSON** format to re-use them across multiple Jira instances.

Export a rule

Rules can be exported from the **rule navigator** or from the **rule detail view**.

Export from the rule navigator

Automation Rules Add rule  

Status: All Trigger: All Event: All Creator: All X

Status	Name	Trigger	Event	Creator	Created	Last modified	Actions
	Add Issue Link	FIELD CHANGED EVENT		Admin Istrator	16/Jul/19 8:41 AM	2 hours ago Admin Istrator	
	Add sub-tasks to issue on creation	ISSUE EVENT	Issue Created	Admin Istrator	19/Mar/19 2:32 PM	15/Jul/19 1:33 PM Admin Istrator	
	Add sub-tasks to issue on creation (1)	ISSUE EVENT	Issue Created	Admin Istrator	15/Jul/19 3:04 PM	15/Jul/19 Admin Istrator	
	Assign issue on transition	ISSUE TRANSITIONED EVENT		Admin Istrator	20/Mar/19 12:07 PM	20/Mar/19 Admin Istrator	
	Assign issue to last assignee on transition	ISSUE TRANSITIONED EVENT		Admin Istrator	19/Mar/19 3:12 PM	19/Mar/19 Admin Istrator	
	Create sub-tasks depending on selected values in custom field	ISSUE EVENT	Issue Created	Admin Istrator	19/Mar/19 3:44 PM	15/Jul/19 1:36 PM Admin Istrator	
	Keep priority of parents and sub-tasks in sync	FIELD CHANGED EVENT		Admin Istrator	19/Mar/19 1:40 PM	19/Mar/19 1:41 PM Admin Istrator	
	Notify project lead on priority change	FIELD CHANGED EVENT		Admin Istrator	19/Mar/19 11:27 AM	15/Jul/19 1:44 PM Admin Istrator	
	Raise priority of overdue issues every morning	FIELD CHANGED EVENT		Admin Istrator	12/Mar/19 1:48 PM	12/Mar/19 2:02 PM Admin Istrator	
	Remind users to resolve inactive issues	SCHEDULED RULE		Admin Istrator	14/Mar/19 1:34 PM	14/Mar/19 1:38 PM Admin Istrator

Notify project lead on priority change

FIELD CHANGED EVENT

When the **PRIORITY** field changes to **BLOCKER**.

ADD COMMENT

Comment text Hi [% PROJECT LEAD (TRIGGER)], the priority on this issue has changed to Blocker.
You may want to take a look at this. Cheers!

Import Automation Rules

Import as JSON

```
{
  "name": "Add sub-tasks to issue on creation",
  "description": "",
  "creator": "admin",
  "status": true,
  "triggerData": "1",
  "triggerType": "ISSUE_EVENT",
  "configuration": {
    "refs": [
      "issue",
      "system",
      "trigger.issue",
      "trigger.parent"
    ],
  },
}
```

Import from file

Choose Files

No file chosen

Next

Cancel

After clicking on either the export button, the **JSON file can be downloaded** or the **code can be copied**.

After clicking on either import button you can decide whether you want to paste code from your clipboard (**Import as JSON**) or upload a JSON file (**Import from file**).

If you still have questions, feel free to refer to our [support](#) team.
